Technical Lead & Product-Focused Engineer

Technical Lead with 8+ years bridging engineering and product to deliver exceptional software. Expert at making product delivery successful by connecting technical execution with business needs. I excel at collaborating with product managers, designers, and stakeholders through direct, transparent communication to shape feasible roadmaps while mentoring engineers to foster growth and autonomy.

Web technology expert with deep knowledge of JavaScript ecosystems, Node.js, security, performance, and design systems. Early adopter of AI coding tools to boost team productivity. I thrive when establishing agile, squad-focused workflows where teams naturally succeed.

EXPERIENCE

Technical Lead @ JLL

Aug 2021 – Present

- Lead squad of **8 engineers** building Investor Center and DealX, JLL's **flagship capital markets platforms** for investment and deal execution
- Provide **technical architecture guidance** to additional squads, ensuring consistency across platform services and optimal technical decisions
- Active contributor to the development of the **enterprise design system**, establishing patterns and components used across multiple products
- Established agile, squad-focused methodology resulting in **autonomous teams** that deliver consistently without constant oversight
- **Mentor and develop engineering talent** while fostering positive team culture focused on wellbeing, helping members grow into senior roles in an environment where they thrive
- Drive technical decisions using **TypeScript, Node.js, NestJS, React and Next.js** among others, ensuring high standards of performance, security, and maintainability
- Champion **adoption of AI coding assistants** and modern development tools to enhance team productivity

TECHNICAL SKILLS

Core Stack

- JavaScript, TypeScript, HTML, CSS, SCSS
- Node.js & Web Development
- React & Next.js
- NestJS
- Web Performance & Security
 - Angular, Vue & Web Components
 - Azure Cloud Services

What I Actually Do

- Shape product strategy with stakeholders
- Build autonomous engineering teams
- Bridge technical and business needs
- Champion AI coding assistants adoption
 - Mentor engineers to senior roles
 - Drive architectural decisions
 - Establish agile workflows

Full-Stack Engineer & Trainer @
Freelance

Jan 2020 – Aug
2021

- Delivered **1,000+ hours** of web development training to corporate teams at **BBVA, Telefónica, and ONCE**
- Built high-performance PWA with SSR and advanced hydration strategies for enterprise clients
- Taught modern web stack including JavaScript, Node.js, React, Angular, Vue, and Web Components

Frontend Engineer @ BBVA

Jun 2018 – Jan 2020

- Core team member enhancing developer experience for **50+ engineers** on major banking platform
- Improved performance, accessibility, testing infrastructure, and build processes using vanilla JavaScript
